

LUNG CLEANSE

A lung cleanse is a natural procedure designed to detoxify, cleanse and refresh the delicate respiratory linings of the bronchial passages and lungs by purging them of built up environmental toxins, harmful organisms and accumulated irritants.

Cleansing the lungs is something that should be done on a regular basis due to the declining quality of indoor and outdoor air. The toxic air we breathe puts all of our lungs and respiratory tracts in danger. By using our lung cleanse formula on a regular basis you can assist your lungs in cleansing these compounds, which in turn will support normal respiratory function.

Lung cleanse can be used for smoker to help clean and protect the respiratory system.

Main Functions:

- Helps the lung to remove stagnant pollutants from the lung into the general blood circulation where they can be filtered and removed.
- Promotes normal lung function.
- Revitalizes lung vitality and strength.
- Soothes the throat during times of discomfort.
- Supports clearing mucus from the sinus passages.
- Helps reduce inflammation that contributes to asthma, liver disease and heart disease.
